

## Compact direct drive

VDL Agrotech has developed a new compact direct drive. The new direct drive has a solid closed powder-coated construction. The protection cover will be initially supplied in sendzimir galvanized steel. Later on the protection cover will be supplied in impact-resistant PC ABS.

For standing and winchable systems new support sets, suspension sets and anti-perch covers are available.

Optional a mounting bracket set is available to mount the new compact drive in aviary and cage systems to match the existing configuration. This makes the new compact drive in all systems interchangeable with the existing drive unit

### Overview of new versions with additional benefits:

# Overview of the part numbers of the existing version and the subsequent part numbers of the new compact version

## Separate drive units:

### Standard version (shaft=Ø35mm)
